EDUCATION

Kingston University *Sept 2023 – Jul 2026*

BSc (Hons) Aerospace Engineering – First-Class Honours Achieved

Scholarship: Awarded a 50% academic scholarship during Years 1–2 in recognition of academic performance

Relevant Modules: Aircraft Performance, Aircraft Dynamics & Control, Thermodynamics & Fluid Mechanics, Materials Failure & Structural Analysis, Aircraft Systems

Dissertation: "Optimisation of Microsoft Teams within the Undergraduate Learning Environment"

- Final-year research investigated how Microsoft Teams and integrated Microsoft 365 tools could improve communication, organisation and productivity within undergraduate learning environments. Used questionnaire analysis, semi-structured interviews and live project observation to identify areas for improvement and develop practical recommendations, strengthening skills in data analysis, process improvement and decision-making.
- **Tools Used:** Microsoft Project, Microsoft Teams, Microsoft 365 (Excel, Word, OneNote, Planner, Whiteboard, SharePoint, Forms)

Colombo South International College (Sri Lanka) *Completed 2022*

Edexcel International Advanced Level (IAL) & IGCSE Qualifications

Edexcel International Advanced Level (IAL) Examination:

- Mathematics – A | Physics – A | Chemistry – A |
- **Full marks** (300/300) in AS Level Physics and Chemistry

Pearson Edexcel IGCSE Examination:

- 2 A*s, 3 As & 1 B (A*s achieved in Mathematics and Commerce, with an A in Physics)
- **Achieved the highest mark in the country (Sri Lanka) for Pearson Edexcel IGCSE Mathematics**

RELEVANT ENGINEERING PROJECTS

1. **Aircraft Design Group Project (Discus-2C Glider) –** Designed and tested a 1.2 m hand-launched glider in a multidisciplinary team, incorporating cost analysis and feasibility. Awarded the **Winner's Award** for Best Group Project in the department at Kingston's ECE Showcase 2026, demonstrating effective collaborative engineering and testing.
2. **Shimmy Damper Design & Build –** Designed and manufactured a functional 1:1 scale Cessna shimmy damper within an engineering team, applying material selection, manufacturing planning, quality assurance and risk mitigation. Strengthened practical mechanical design and project management skills through component development and manufacture.
3. **Aircraft Structural FEA Analysis –** Modelled four Piper PA-28 wing-spar geometries using steel and Aluminium 6061, comparing stress, displacement and safety factors across eight configurations. Applied simulation-led structural assessment to evaluate strength, weight efficiency and structural performance, developing data-driven design optimisation skills.
4. **Green Aircraft Research Project –** Investigated emerging aircraft technologies and sustainable propulsion concepts targeting carbon-free aviation by 2050. Evaluated technological challenges, environmental considerations and operational feasibility, developing research and engineering assessment skills to inform future aerospace design decisions.

WORK EXPERIENCE

International Mathematics & Physics Tutor *2022 – Present*

Freelance

- Tutored GCSE, IGCSE and A-Level Mathematics and Physics across Edexcel, Cambridge and AQA for students in the UK, Australia, Canada, the UAE, Maldives and other international markets, developing strong technical communication across varied audiences.
- Analysed student performance and tailored teaching to strengthen problem-solving and technical understanding, helping students progress from B grades to A/A* results through structured, evidence-based improvement.

- Grew the tutoring business through results, referrals and targeted marketing while completing my Aerospace Engineering degree, helping fund my studies and demonstrating strong responsibility, time management and commitment.

Sainsbury's ***July 2026 – Present***

Service Assistant

- Prepared and verified online customer orders accurately and efficiently in a fast-paced environment, maintaining strict service standards and developing strong attention to detail and prioritisation under pressure.
- Collaborated across store functions to resolve customer enquiries and maintain smooth operations during busy trading periods, strengthening teamwork and reliability under pressure.

KB Repairs (Automotive Repair, Diagnostics & Restoration) ***May 2026 – July 2026***

Automotive Engineering Apprentice

- Conducted vehicle diagnostics, fault-finding, ADAS calibration and electrical/mechanical troubleshooting to identify & resolve automotive system issues, strengthening systematic fault analysis & vehicle problem-solving.
- Removed and reinstalled mechatronic units, gearboxes, air filtration systems and vehicle interior assemblies, developing practical understanding of vehicle systems, integration and component interaction.
- Supported vehicle testing, maintenance and quality assurance in a fast-paced workshop, strengthening structured testing, validation and collaborative problem-solving against safety and performance requirements.

Dudes Arc (Pvt) Ltd. (Die-Cutting Technology & Industrial Supplies) ***Mar 2021 – Sep 2025***

Operations & Customer Support Assistant

- Operated industrial die-cutting equipment and demonstrated machinery, tooling and packaging materials to commercial customers, developing practical technical communication and equipment-handling skills.
- Supported product analysis, procurement, inventory control and logistics, contributing to efficient cross-functional operations and stronger coordination across business functions.
- Maintained purchasing, inventory and financial records in QuickBooks, supporting accurate reporting, operational visibility and informed day-to-day decision-making.

Smart EDU (Pvt) Ltd. (Online Education & Academic Tutoring) ***Mar 2024 – Sep 2025***

Mathematics & Physics Tutor

- Taught technical Mathematics and Physics across mechanics, kinematics, forces, moments, vectors, calculus, aerodynamics, materials and stress–strain behaviour, reinforcing strong engineering fundamentals.
- Frequently regarded as one of the institute's strongest Mathematics and Physics tutors, reflecting strong student outcomes and clear technical communication.
- Invited to create premium study packs and recorded solution walkthroughs, demonstrating structured analytical problem-solving and the ability to communicate technical reasoning clearly.

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: CAD Modelling, Aerodynamic Design & Analysis, Finite Element Analysis, Computational Fluid Dynamics, Structural Analysis, Dynamic Systems Modelling, Simulation, Material Selection, Manufacturing Planning, Risk Assessment, Testing & Validation, Vehicle Diagnostics.

Software: SolidWorks, Autodesk Inventor, AutoCAD, MATLAB, Simulink, Microsoft Office 365, Microsoft Project, QuickBooks.

Professional Skills: Analytical Problem Solving, Technical Communication, Cross-Functional Collaboration, Teamwork, Leadership, Working Under Pressure, Evidence-Based Decision Making

Languages: English (Native), Sinhalese (Fluent)

Community & Volunteering: Annual church volunteering at MARCSRI Homes, Sri Lanka, supporting children and individuals with physical and mental disabilities through donation drives and community activities; contributed to charitable and community outreach initiatives through the Rotary Club of Colombo Heritage as a prospective member.

Activities & Achievements: School Prefect; Trinity College London Piano Distinctions; football, running; music production, songwriting and vocals; releases on streaming platforms; featured in Sri Lankan Olympic campaign.
